### Summary

An enthusiastic fresh graduate who is dedicated to the development of engaging, responsive and optimized user interfaces. Have a high learning spirit, ability to adapt quickly, and good teamwork skills in a dynamic web development environment. Committed to continuous development and ready to make real contributions in innovative and impactful technology projects.

### Experience

**Frontend Dev, Edutama** Hexagon Inc. *Cimahi, Jawa Barat* **07/2024 - 12/2024**

- Developed and implemented responsive interfaces for Income and Expenditure pages using **Vue.js, Tailwind CSS, and Laravel**, enhancing user experience and usability for multiple user roles (Treasurer and Principal).
- Designed and integrated advanced filtering features, including transaction codes, student names, classes, payment types, and recap (daily, monthly, yearly) for income, as well as submission and approval dates for expenditures, ensuring accurate data retrieval and Presentation using **Date-fns**.
- Built seamless data export functionality to Excel and PDF formats based on active filters, enabling efficient report generation and financial tracking using **Maatwebsite and DomPDF**.
- Integrated REST APIs to connect the frontend components with backend data, optimizing data processing and minimizing latency.
- Conducted end-to-end testing of filtering and export features, ensuring consistent data accuracy and reliability for both income and expenditure records.

**Frontend Dev, Simple Company Profile for Peer Tutors** SMKN 2 Sumedang *Sumedang, Jawa Barat* **08/2024 - 11/2024**

- Developed a fully functional company profile website, including a polished landing page, interactive dashboard, and comprehensive employee CRUD (Create, Read, Update, Delete) management system.
- Implemented responsive UI components using **Laravel Blade and Tailwind CSS**, ensuring seamless cross-device accessibility and optimal performance.
- Designed and structured database schemas for efficient data handling, including employee records and user authentication.
- Integrated Laravel's built-in authentication for secure access control, enhancing user data protection and role management.
- Guided peers through the development process, covering topics such as RESTful routing, database migrations, and CRUD operations.

### Education

**Vocational High School** SMKN 2 Sumedang *Sumedang, Jawa Barat* **06/2022 - 05/2025**

- Major in Software Developer and Game

### skills

#### Hard Skill

- PHP | HTML | Tailwind | CSS | MySQL | Node.js | REST API | Vue.js | Node.js | Laravel | GitHub | JavaScript | REST API | Figma | livewire

#### Soft Skill

- Problem Solving | Time Management | Critical Thinking | Creativity | Effective Communication | Adaptability | Collaboration

### Project

- **Gridas Mart:** Full stack developer without hosting (Laravel, Tailwind CSS, livewire, JavaScript) **(03/2025 - 04/2025)**
